**ratteri e note delle**

**Description:**

Iki Mono is a multifaceted monospaced typeface designed for publishing and coding. Its sans serif structure displays some letterforms (as well as a degree of contrast) that are reminiscent of 19th-century grotesques, while in the non-Slanted versions the letters have been very slightly slanted leftwards. Like typewriter typefaces Iki Mono has to cope with the limitations of a width system that forces shapes into a specific space. This extensive type family of forty weights and styles, from Thin to ExtraExpanded Bold including Slanteds, takes its name 'Iki' from the Japanese word for breath.

**Designed by:**

Beatrice D'Agostino

Regular 12/18 Havendoti io descritto. Studioso Lettor mio, l'anno passato uno libretto da imparar scrivere littera Cancellaresca, la quale, a mio iudicio, tiene il primo loco, mi parea integramente non haverti satisfatto, se ancho non ti dimostrava il modo di acconciarti la penna, cosa in tal exercitio molto necessaria. E pero in questo mio secondo librecino nel quale anchora a satisfazione de molti, ho posto alcune varie sorti de littere (come tu vederai) ti ho voluto descrivere al più breve et chiaro modo che io ho possuto come tu habbi a temperarti detta penna.

Dele varie sorti de littere poi, che in questo Trattatello troverai, se io ti volessi ad una per una descrivere tutte le

Expanded Thin Slanted 18/27 But of that in its proper place, because it suits not with this Section of Filing. You must take care when you use the Rough File, that you go very lightly over those dents the Hammer made in your work, unless your work be forged somewhat of the strongest, for the dents being irregularities

Condensed Regular Slanted 14/22 *Dal primo adunque tratto piano et grosso cioè che alla riversa e tornando per il medesmo se incomincia, principierai tutte le infrascritte littere a b c d f g h l o q s s x x y z. Lo resto poi delo Alphabeto se principia dalo secundo tratto acuto et sottile con il taglio dela penna ascendendo et poi allo ingiù. Ritornando in questo modo designato i e e i m n p r t u ý.*

Regular 11/18 We will take, for Example, a Piece of Stuff called a Quarter, which is commonly two Inches thick, four Inches broad, and seven Foot long. To plane this Square, lay one of its broad Sides upon the Bench, with one of its ends shov'd pretty hard into the Teeth of the Bench-hook, that it may lie the steddier. Then with the Fore-Plane, as you were taught, § 2. Numb. 2. Plane off the roughness the Saw made at the Pit, and work that side of the Quarter as streight in its length and breadth as you can with the Fore-Plane; which you may give a pretty good guess at, if the edge of the Iron have born all the way upon the work, yet you may try by taking up your Work, and applying one end of it to one Eye, whilst you wink with the other, and observe if any Hollow, or

Compressed Regular 14/18 Hor fatto questo, con due tagli assotiglierai l'un lato e l'altro poco di sotto dal primo taglio, facendo che la vada in punta a guisa di vomero, overo a guisa di becco di sparvieri, la quale parte tutta di setto dal primo taglio chiameremo il vomero de la penna. E bisogna fare che detto vomero sia da l'una parte, e da l'altra equalmente tagliato, come nelo exemplo vedi, cioè che'l taglio non penda più da la parte di dentro, che da quella di fuori. E fatto questo prenderai detta penna, e ponerai il vomero di essa con la parte di dentro sopra l'ungia tua del pollice, e col coltello prendendo da la parte di fuori, e venendo in sguinzo all'ingiù verso la punta per spatio di meza costa di coltello, o poco meno, farai la temperatura, la quale, se vorrai che la penna getti sottile farai acuta, ma se vorrai che getti grosso la farai più larghetta.

Expanded Regular 16/22 **The Rough or Course-tooth'd File (which if it be large, is called a Rubber) is to take off the unevenness of your work which the Hammer made in the Forging; the Bastard-tooth'd file is to take out of your work, the deep cuts, or file-strokes, the Rough-file made; the Fine-tooth'd file is to take out the cuts, or file-strokes, the Bastard-file made; and the Smooth-file**

**Compressed Thin 13/20** It is usual, and also very convenient, for any person before he begins to Erect a Building, to have Designs or Draughts drawn upon Paper or Vellum, and also if it be a large Building, to have a Model of it made in Wainscot, in which Designs and Model, the Ground Plat or Ich-nography of each Floor or Story, is delineated and represented; As also the fashion and form of each Front, together with the Windows, Doors, and Ornaments, if they intend any, to wit, Facias, Rustick Quines, Architraves, Friezes and Cornices, are to be shewn in the Draughts or Designs of the Uprights or Orthography es. If more Fronts than one be shewn Perspectively in one Draught, then 'tis called Scenography , which is not easily understood, except by those who understand the Rules of Perspective. Therefore it will be more Intelligible to the

**Condensed Light Slanted 12/20** The several sorts of Files that are in common use are the Square, the Flat, the three Square, the half Round, the Round, the Thin File, &c. All these shapes you must have of several Sizes and of several Cuts. You must have them of several sizes, as well because you may have several sizes of work, as for that it sometimes falls out that one piece of work may have many parts in it joined and fitted to one another, some of them great, and others small; And you must have them of several Cuts, because the Rough-tooth'd File cuts faster than the Bastard-tooth'd File,

**Expanded Regular Slanted 20/22** *Si come a chi vol sapere sonare e bisogno per molte cose, che ponno intervenire sapere anchora accordare lo istruimento, così a chi dee saper scrivere, è necessario per molti rispetti saper temperare le penne. E pero io, che intendo a mio*

**Condensed Bold Slanted 15/22** *Or some other part between the Edges, you must, with the Foreplane Rank-set, plain away that Stuff which bears off the inside of the Tongue from complying all the way with it. But if the Risings be great,*

**Condensed Bold 15/22** *Having thus tryed one side of the Quarter straight and flat, apply the inside of the Handle to it, and if one of the adjoining sides of the Quarter, comply also with the inside of the Tongue all the way, you need only smooth that adjoining side: But if it do not so*
